

Alex Hamrick, SVP Supply Chain

Alex Hamrick is the Senior Vice President of Supply Chain, where he leads the holistic strategy and execution of HD Supply's supply chain, delivering products to customers through HD Supply's private fleet and third-party providers. He oversees all supply chain functions, including inventory, distribution and fulfillment, transportation (import and domestic), and final-mile delivery to customers.

Alex comes to HD Supply from The Home Depot, where for the past 12 years he held roles of increasing responsibility across both operational and analytical functions in online and store-based businesses. Most recently, he was responsible for end-to-end analytics, data science, data architecture, and project management functions for The Home Depot supply chain. This work included optimizing product flow path selection, stocking location optimization, forecasting and capacity planning in distribution centers, network optimization, transportation and delivery cost and service optimization, and SKU productivity across the supply chain network. Alex's teams apply traditional analytical methods and are actively developing machine learning and AI use cases throughout the supply chain.

Prior to joining The Home Depot, Alex worked at CHEP in a variety of supply chain roles, including network optimization, demand forecasting, and inventory management.

Alex holds a master's degree in Economics from the University of Virginia and bachelor's degrees in Applied Mathematics, Statistics, and Economics from the University of Central Florida. He grew up in Tampa, Florida, and currently resides in Atlanta, Georgia, with his wife and two daughters.
